

Florida Polytechnic Cybersecurity Club Agreement

The Florida Polytechnic University Cybersecurity Club aims to provide prospective members opportunities to learn general cybersecurity topics and delve into specifics within offensive and defensive security techniques. We strive to encourage safe online practices, promote the importance of ethical hacking, and inform students of current events in information security while following the Computer Fraud and Abuse Act as stated in Title 18 of the United States Code, ISC2 Code of Ethics, and the Florida Polytechnic Cybersecurity Club Code of Conduct.

Signing this agreement means you will not apply anything learned in the club to any malicious or unethical act. The information gained in the meeting is to further the career and skills for individuals to get jobs after graduation. Everything is done ethically and done in test environments.

By signing this, you agree to uphold these values and represent the club in any online space in the best possible light. You also agree that if anything described in the Florida Polytechnic Cybersecurity Code of Conduct, ISC2 Code of Ethics, and Computer Fraud and Abuse Act is violated, the responsibility lies solely on the signee and has no correlation to the club or its teachings.
